

Elevator Pitch:

30-45 seconds:

Hi, I am Markus Tratschitt, a Full Stack developer based in Mainz. I focus on TypeScript-heavy web applications using Vue.js/Nuxt on the frontend and Node.js services on the backend. During my training, I delivered multiple production web projects and maintained live systems, including feature extensions like payments and scheduling. I enjoy building internal platforms and workflow applications where clean architecture, reliability, and security matter, and I work well with product and UX teams in an agile setup.

10-15 seconds:

I am a TypeScript Full Stack developer using Vue/Nuxt and Node.js. I build reliable web platforms end-to-end with clean APIs, maintainable code, and a focus on performance and security.

Personal Brand Statement:

TypeScript Full Stack Engineer specializing in Vue.js/Nuxt frontends and Node.js backend services for enterprise platforms and workflow applications, focused on maintainability, performance, and practical security. I keep them clean, scalable, and stable in production.

Salary Negotiation Letter:

Subject: Compensation discussion for Full Stack Engineer role

Dear Hiring Team,

Thank you for the offer and the opportunity to join Bionorica SE as a Full Stack Engineer. I am excited about the team and the work, especially the focus on TypeScript, Vue/Nuxt, and Node.js services for enterprise platforms.

Based on the scope of the position and market levels in Germany, I would like to discuss a base salary in the range of 55.000 to 60.000 EUR per year. I believe this reflects the responsibilities around scalable development, API design, enterprise integrations, and contributing to performance and application security.

I am open to aligning on the overall package, including bonus and development budget, and I am happy to discuss the details to reach a fair agreement.

Best regards,

Markus Tratschitt

Letter of Interest:

Subject: Letter of Interest - Full Stack Engineering

Dear Hiring Team,

I am writing to express my interest in Full Stack Engineering opportunities at Bionorica SE. I focus on TypeScript-based product development, building Vue.js/Nuxt frontends and Node.js backend services for internal platforms, customer-facing portals, and workflow applications.

I am especially interested in teams that value clear API contracts, maintainable architecture, and reliable delivery. In my recent experience, I delivered production web projects end-to-end and maintained live systems through updates and feature expansions, which strengthened my focus on stability, performance, and practical application security.

I would welcome the opportunity to learn more about your roadmap and discuss how I could contribute to your internal digital product initiatives.

Sincerely,

Markus Tratschitt
